

LOCAL WELLNESS POLICY

Federal law requires that schools assess the implementation of their district or charter school's local wellness policy at least once every three years. Although a school's response of 'No Action Taken' will receive an 'X' in this report, schools that have completed this section of the assessment have met the requirement to assess their implementation of the local wellness policy. Given that the rule was enacted in June 2017, a response of 'No Action Taken' is acceptable and will not reflect negatively on your school, district, or charter school. All other responses in this section will receive a '✓' as any progress made towards implementing the goals of the local wellness policy is considered best practice in this report.
