

# Creating Tomorrow's Innovators

21st century technologies have opened up new paths for success, and gifted students' curiosity and intense interests make them uniquely suited to blaze these new trails. At the same time, gifted characteristics such as perfectionism and impostor syndrome can hold them back. We will discuss how parents can support students, empowering them to become tomorrow's innovators.

## Speaker: Ian Byrd

Ian taught gifted students in California where he grew up as a gifted kid himself. On his journey to become a teacher, he earned a degree in Computer Science, briefly played bass in an almost successful rock band, and married a fashion designer. Ian now lives in Portland, Oregon where he writes about gifted education at [Byrdseed.com](http://Byrdseed.com), develops videos for students at [Byrdseed.TV](http://Byrdseed.TV), and creates online courses at [GiftedGuild.com](http://GiftedGuild.com).
