

Take your first AP class...

AP Human Geography

- This class is a great introduction to AP classes. Students learn the skills of an AP class and explore global topics related to humans and their world.

Take Honors Classes

- **English 9 Honors** and **Honors World Studies** prepare you for other AP courses that will open up for you in the 10th, 11th, and 12th grades.

Consider AVID

- This program is designed to help build the skills and habits required by advanced classes and, ultimately, college. AVID is highly encouraged, especially if taking AP courses as a Freshmen.

- ◆ AP World History

Benefits of the AP Program

- Students experience a rigorous, college-level curriculum and have the chance to earn credit, placement, or both for college.
- AP Schools often experience a diffusion of higher academic standards throughout the entire curriculum
- Colleges admit students prepared to tackle rigorous course work. According to a U.S. Department of Education study, participation in AP or other rigorous courses is a stronger predictor of success in college than test scores or grade point average.
